

# VrindaaCorp Services — CRM Administrator & Operations Guide

---

## Comprehensive Operational Manual • Enterprise Production Edition

System: VrindaaCorp Enterprise CRM & Autonomous Outreach Infrastructure

Portal URL: <https://vrindaacorp-crm.tech>

Version: 1.0 (Production Release) • Handover Date: September 2026

---

## 1. Executive Introduction & System Vision

Welcome to **VrindaaCorp CRM**, the enterprise-grade Lead Management, Multi-Channel Campaign Outreach, and Autonomous Intelligence platform designed specifically for **VrindaaCorp Services**.

As an integrated facility management, hard services (HVAC, electrical, plumbing), housekeeping, 24/7 security, and corporate catering provider operating across **Delhi-NCR, Greater Noida West, Uttar Pradesh, and pan-India**, VrindaaCorp requires a unified platform to:

1. **Centralize Corporate Prospect Intelligence:** Maintain verified records for facilities managers, administrative heads, and procurement directors.
  2. **Automate Sector-Specific Outreach:** Deliver tailored, high-converting B2B emails to Corporate Offices, Healthcare Facilities, Manufacturing Plants, Educational Institutions, and Industrial Parks.
  3. **Protect Sender Domain Reputation:** Implement strict mathematical warmup pacing and in-house email validation to guarantee primary inbox delivery.
  4. **Empower Executive Leadership via WhatsApp:** Alert the Owner and Sales Directors within 30 seconds of client replies, providing AI-drafted responses for instant one-click approval.
- 

## 2. Accessing the CRM & User Authentication

### 2.1 Portal Login

---

1. Open any modern desktop or mobile browser and navigate to:

<https://vrindaacorp-crm.tech/login>

2. Enter your authorized corporate email and password:

- **Default Admin Account:** [admin@vrindaacorp.com](mailto:admin@vrindaacorp.com)
- **Initial Seed Password:** [admin123](#)

3. Click **Sign In**.

**[TIP]:** After logging in for the first time, navigate to **Account Settings** in the lower-left sidebar to update your password and configure your WhatsApp phone number.

## 2.2 Security & Rate Limiting Notice

The CRM login endpoint enforces an automated rate limiter (**maximum 5 attempts per minute per IP address**). If multiple incorrect passwords are submitted, access will be temporarily throttled for 60 seconds to protect against brute-force attacks.

## 3. Mission Control: Dashboard & Executive Analytics

The **Dashboard** (/) is your operational mission control, aggregating real-time metrics across all lead sources and outreach sequences:

|                                        |                                      |                                          |                                      |
|----------------------------------------|--------------------------------------|------------------------------------------|--------------------------------------|
| Total Leads<br>1,196<br>100% Validated | Emails Sent<br>482<br>Today: 48 / 50 | Unique Open Rate<br>38.4%<br>185 Readers | Inbound Replies<br>19<br>100% Caught |
|----------------------------------------|--------------------------------------|------------------------------------------|--------------------------------------|

### Key KPI Definitions:

- Total Leads:** Total deduplicated corporate prospects stored in the CRM database.
- Emails Sent Today:** Number of outreach emails dispatched during today's safety window (09:30 AM – 05:00 PM IST) vs. current daily cap.
- Unique Open Rate:** The true engagement percentage:  $\text{Open Rate} = \frac{\text{Distinct Leads Who Opened}}{\text{Distinct Leads Sent}} \times 100\%$
- Inbound Replies:** Total client responses captured by the 30-second IMAP poller.

### Multi-Filter Toolbar

Filter the dashboard view and all metric graphs using the global toolbar:

- Timeframe:** Today, Last 7 Days, Last 30 Days, Quarter-to-Date, Year-to-Date, All Time.
- Target Sector:** Corporate, Healthcare, Industrial, Education, Hospitality, Retail.
- Regional Hub:** NCR (Delhi, Gurgaon, Noida), UP (Lucknow, Kanpur), pan-India.
- Lead Owner:** View metrics for specific sales representatives.

### Exporting Executive Excel Reports

Click the **Export Report** button in the upper-right corner. The CRM dynamically generates a multi-sheet **.xlsx** workbook containing:

- Executive Summary** (High-level KPIs and filter criteria).
- Outreach Velocity** (Daily send, open, click, and reply counts).
- Pipeline Distribution** (Lead counts and conversion rates by stage).
- Filtered Leads Table** (Full contact details for offline review).

## 4. Managing Leads & Customer Folders

The **Leads** view ( </leads> ) functions as your digital rolodex with comprehensive search, filtering, and bulk action capabilities.

### 4.1 Understanding Verification Badges

Every lead uploaded or captured is evaluated by the in-house 6-layer verification engine:

| Status Badge                | Color                                                                                    | Meaning & Safety Recommendation                                                                                                                       |
|-----------------------------|------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>VALID</b><br>(Corporate) |  Green  | Verified B2B enterprise email ( <a href="#">@tcs.com</a> , <a href="#">@maxhealthcare.com</a> ). 100% safe for outreach.                              |
| <b>VALID</b> (Webmail)      |  Blue   | Verified active consumer address ( <a href="#">@gmail.com</a> , <a href="#">@yahoo.com</a> ). Safe to email.                                          |
| <b>RISKY</b>                |  Yellow | Role-based inbox ( <a href="#">info@</a> , <a href="#">admin@</a> , <a href="#">sales@</a> , <a href="#">support@</a> ). Can be emailed with caution. |
| <b>INVALID</b>              |  Red    | Syntax error or domain has no active DNS MX mail servers. Automatically suppressed.                                                                   |
| <b>DISPOSABLE</b>           |  Gray   | Temporary/burner domain ( <a href="#">mailinator.com</a> , <a href="#">tempmail.com</a> ). Automatically blocked.                                     |

### 4.2 Inside the Lead Customer Folder

Click any lead's name to open their profile ( [/leads/\[id\]](/leads/[id]) ):

- **Overview Header:** Stage dropdown, contact info, owner assignment, and [Hot Lead](#) toggle.
- **Contract Intelligence Card:** Track incumbent facility vendor name, contract expiration date, and automated 30-day renewal reminders.
- **Activity Timeline:** Complete chronological history of emails sent, opens recorded, replies received, and stage progressions.
- **Internal Sales Notes:** Add private notes regarding client site visits, RFPs, or cafeteria headcount requirements.
- **Follow-Up Tasks:** Assign actionable tasks with due dates to team members.

## 5. In-House Lead Import & Cleansing Guide

The CRM features a **zero-external-cost, 100% in-house spreadsheet import engine** located at </import> .

### Step-by-Step Import Instructions:

1. Navigate to **Import & Cleanup** ( </import> ) in the sidebar.
2. Drag and drop your [.csv](#) or [.xlsx](#) spreadsheet into the upload zone.
3. **Map Your Columns:** The CRM will inspect your header row and auto-suggest matches:

- **First Name** → Contact's first name
- **Company** → Enterprise / facility name
- **Email** → Work email address (Mandatory)
- **Phone** → Mobile / landline (Auto-formatted to **+91 XXXXX XXXXX** )
- **Sector** → Industry ( **Corporate** , **Healthcare** , **Industrial** , etc.)
- **City** → Facility location ( **Gurgaon** , **Noida** , **Greater Noida** , etc.)

4. Click **Process & Cleanse Leads**.

5. The system will process records in the background, validating DNS MX records and auto-correcting common domain typos (e.g., **gamil.com** → **gmail.com** ).

6. Upon completion, a summary modal displays total rows imported, duplicates skipped, and invalid records suppressed.

## 6. The Visual Sales Pipeline (Kanban Board)

The **Pipeline** view ( **/pipeline** ) provides a visual Kanban board displaying your deals across 7 standard stages:

### Pipeline Progression Rules:

- **Auto-Progression to **CONTACTED**** : The moment the campaign worker dispatches the initial outreach email, the lead automatically shifts from **NEW** to **CONTACTED** .
- **Auto-Progression to **REPLIED** ( 🔥 Hot Lead)**: When an inbound reply is detected via IMAP, the lead moves to **REPLIED** , active cold sequences are paused, and a WhatsApp alert is dispatched.
- **Manual Drag-and-Drop**: Drag deal cards into **QUALIFIED** , **PROPOSAL\_SENT** , **WON** , or **LOST** as negotiations advance.

## 7. Campaign Sequence Builder & Automated Outreach

The **Campaigns** section ( **/campaigns** ) manages automated multi-step email sequences designed to run continuously on autopilot.

### 7.1 Creating a Targeted Campaign

1. Click + **Create Campaign**.
2. Give the campaign a descriptive title (e.g., **Batch 1 - Healthcare Facilities NCR** ).
3. Select your **Target Segment Filters**:
  - Filter by Sector: **Healthcare**
  - Filter by Region: **NCR**
  - Filter by Validation Status: **VALID**

- 4. The CRM displays the real-time matching lead count.

## 7.2 Building Sequence Steps

A campaign consists of multiple sequential emails separated by day delays:

- **Step 1 (Delay: 0 Days):** Initial value-driven introductory outreach.
- **Step 2 (Delay: 3 Days):** Gentle follow-up referencing specific sector pain points.
- **Step 3 (Delay: 6 Days):** Final consultative check-in proposing a brief discovery call.

## 7.3 Manual Dispatch vs Scheduled Pacing

-  **Trigger Outreach Now:** Opens the execution modal to immediately dispatch due emails. Allows overriding the standard business hours window for urgent testing.
- **Schedule Outreach:** Schedule a send for a specific future window (e.g., "Tomorrow at 09:30 AM IST").
- **Automated Background Pacing:** The background worker ( `vrindaa-worker` ) automatically checks every 5 minutes during the active window ( `09:30 AM - 05:00 PM IST` ) and claims up to 25 leads per run, adhering strictly to the daily sending cap.

# 8. Campaign Template Editor & AI Refinement

Click **Edit / Refine with AI** on any sequence step to open the full-screen **Template Studio**:

## 8.1 HTML Copy Editor & Merge Tokens

Use standard HTML tags ( `<p>` , `<strong>` , `<em>` , `<ul>` , `<li>` , `<a>` ) with dynamic curly-brace tokens:

- `{{firstName}}` → Prospect's first name (defaults to "there")
- `{{company}}` → Enterprise name (defaults to "your organization")
- `{{city}}` → Facility city (e.g., "Gurgaon")
- `{{geography}}` → Regional hub (e.g., "Delhi-NCR")
- `{{industryHook}}` → Tailored value proposition for the lead's sector

## 8.2 Strict Calendly Booking Link Enforcement

The CRM enforces strict compliance with VrindaaCorp's official scheduling link:

```
https://calendly.com/vrindaacorp-sales/30min
```

- **One-Click Insert Button:** Click the green  `+ Book a Call Link` button in the token toolbar to instantly inject:

```
<p><a href="https://calendly.com/vrindaacorp-sales/30min">Book a 30-min call</a></p>
```

- **Quick Suggestion Pill:** Click  `Add Calendly Booking Link` to have Ollama craft a polished call-to-action inviting the recipient to schedule a discussion.

### 8.3 Live Lead Preview

---

Switch to the **Live Lead Preview** tab to render the exact email as it will appear to real prospects from your database, validating all token replacements and clickable hyperlinks.

---

## 9. WhatsApp Autonomous AI Co-Pilot

The WhatsApp Co-Pilot runs autonomously on your VPS, turning the Owner's mobile phone into an executive command station.

### 9.1 Initial Device Pairing via QR Code

---

1. Navigate to **Settings** → **WhatsApp Agent** ( `/settings/whatsapp` ).
2. The page displays a secure QR code generated by the internal Evolution API gateway.
3. Open **WhatsApp** on the Owner's phone → **Settings** → **Linked Devices** → **Link a Device**.
4. Scan the QR code. The interface will update to `Connected (Online)` .

### 9.2 Daily Operational Briefings

---

- **09:00 AM Morning Game Plan:** Pushes today's targeted send quota, sector allocations, and domain health status.
- **09:00 PM Day-End Briefing:** Summarizes daily sent volume, open rates, cumulative campaign reach, and lists **High-Intent Repeat Openers** (prospects who opened 3x or 4x).
- **Bi-Weekly Domain Scaling Audit:** Every 14 days, audits 14-day bounce rates and suggests scaling to the next warmup tier.

### 9.3 Inbound Revert Alert & 1-Click Approval Loop

---

When a prospect replies to an email:

1. A rich alert arrives on WhatsApp with the client's message snippet.
  2. The local Ollama model crafts a professional B2B reply respecting all Owner Strategic Playbook rules and the Calendly booking link.
  3. **To Send Immediately:** Reply `"YES"` or `"SEND"` .
  4. **To Revise:** Reply with your guidance (e.g., *"Offer a 10% inaugural discount and schedule for Thursday"*). The agent regenerates the draft and asks for re-confirmation.
- 

## 10. System Settings & Team Management

### 10.1 Managing Users (`/settings/users`)

---

- Add sales representatives and assign roles:
  - `ADMIN` : Full access to all campaign settings, imports, templates, and users.
  - `OWNER` : Executive access with strategic memory controls and WhatsApp co-pilot briefings.
  - `AGENT` : Scoped access limited to viewing assigned leads and updating pipeline stages.
- Configure each user's **WhatsApp Number** in international format ( `+919876543210` ) to enable personal alerts.

## 10.2 Lead Sources & Webhooks (/settings/sources)

---

- Retrieve your public website form endpoint ( [/api/inbound/form](#) ) and shared secret.
  - Test Meta and Google Ads webhooks using the built-in simulator.
-
