

VrindaaCorp Services — Staff Quick-Reference SOP & Pocket Guide

Standard Operating Procedures (SOP) • Daily Execution Manual

Target Audience: Sales Executives, Business Development Managers & Operations Staff

System: VrindaaCorp Enterprise CRM & Autonomous Outreach Infrastructure

Version: 1.0 (Production Release) • Handover Date: September 2026

| 1. Daily Routine SOP (The 5-Step Daily Sales Rhythm)

Follow this operational rhythm to ensure maximum conversion on outbound campaigns:

Time Allocation Breakdown:

1. 09:00 AM – 09:30 AM (Morning Game Plan):

- Check the automated WhatsApp brief sent to the management group.
- Review the CRM Dashboard (<https://vrindaacorp-crm.tech>) to verify today's dispatch quota.

2. 09:30 AM – 01:00 PM (Hot Revert Fast Action):

- Filter the Leads table by `Stage: REPLIED` and `Hot: true` .
- Call or reply to all new prospect inquiries. Target: < **30-minute first response time**.

3. 01:00 PM – 03:00 PM (Pipeline Progression):

- Open `/pipeline` (Kanban Board).
- Move progressed leads to `QUALIFIED` or `PROPOSAL_SENT`.
- Update contract intelligence fields (incumbent vendor, contract expiry date).

4. 03:00 PM – 05:00 PM (List Uploads & Quality Review):

- Upload new prospect spreadsheets via `/import`.
- Verify that all newly enrolled contacts display ● `VALID` status badges.

5. 09:00 PM (Night Briefing & Queue Planning):

- Check the 09:00 PM WhatsApp Day-End report.
- Note down prospects marked as `High-Intent Repeat Openers (3x or 4x)` for priority phone calls the next morning.

2. Inbound Reply SOP: Responding to Hot Reverts

When a prospect replies to an outreach email, the system automatically pauses their cold sequence, updates their stage to `REPLIED`, and triggers an alert.

Action Steps:

1. Option A (Via WhatsApp):

- Read the incoming alert on your mobile phone.
- If the proposed reply is accurate, reply `"YES"` or `"SEND"`.

- If you want adjustments, text your feedback directly (e.g., "Add our PSARA certificate and schedule for Thursday 2 PM").

2. Option B (Via CRM Lead Profile):

- Open `/leads/[id]`.
- Read the client's email in the Activity timeline.
- Click **Compose Reply** or place a direct phone call to the contact.
- **Mandatory Link Rule:** If inviting them to schedule a meeting, strictly use:

`https://calendly.com/vrindaacorp-sales/30min`

Never use unauthorized links or informal placeholders.

3. Lead Import SOP: Preparing & Cleansing Spreadsheets

Follow this checklist before uploading any new lead lists to protect our domain deliverability:

3.1 Spreadsheet Preparation Checklist

- ☒ **File Format:** `.xlsx` (Excel) or `.csv` (Comma Separated Values).
- ☒ **Header Row:** The first row must contain clear column labels (e.g., `First Name`, `Company`, `Email`, `Phone`, `City`, `Sector`).
- ☒ **Email Format:** Clean emails without trailing spaces, semicolons, or extra brackets.
- ☒ **Phone Format:** Indian 10-digit mobile numbers (the CRM auto-adds `+91`).

3.2 Interpreting Validation Status Badges

Status Badge	Can We Email Them?	Operational Action
 VALID (Corporate)	YES (Primary Target)	Enterprise domain verified via live DNS MX probe. Enroll in campaigns immediately.
 VALID (Webmail)	YES	Active Gmail/Yahoo address. Safe to send personalized introductory emails.
 RISKY	CAUTION	Role mailbox (<code>info@</code> , <code>admin@</code> , <code>sales@</code>). Prefer calling via phone rather than cold bulk emailing.
 INVALID	NO (Blocked)	Email does not exist or domain has no mail servers. Do not attempt to send.
 DISPOSABLE	NO (Blocked)	Temporary throwaway mailbox. Auto-suppressed by the system.

4. Visual Pipeline SOP: Stage Movement Criteria

Maintain strict data integrity on the Kanban Board (`/pipeline`):

[NEW] → [CONTACTED] → [REPLIED] → [QUALIFIED] → [PROPOSAL SENT] → [WON 🏆]

Pipeline Stage	Exit Criteria / When to Advance Card
1. NEW	Lead imported or captured from website. Unreached.
2. CONTACTED	Automated outreach email has been sent. <i>(Automated by system)</i> .
3. REPLIED	Prospect responded via email, WhatsApp, or phone. <i>(Automated by system)</i> .
4. QUALIFIED	Sales executive completed a discovery call and confirmed: (1) Facility size > 10,000 sq ft, (2) Active budget, (3) Key decision maker identified.
5. PROPOSAL_SENT	Formal commercial quotation, staffing estimate, or cafeteria tasting session proposal submitted.
6. WON (Deal Closed)	Service agreement signed, work order issued, or security deployment initiated.
7. LOST	Deal discontinued. Mandatory Note: Must add note explaining reason (e.g., "Budget mismatch", "Existing contract renewed for 1 year").

5. Contract Intelligence SOP: Tracking Competitors

VrindaaCorp's competitive advantage lies in knowing when a prospect's incumbent contract is coming up for renewal:

1. Open the prospect's lead card (`/leads/[id]`).
2. Locate the **Contract Intelligence** section on the right side.
3. Fill in the verified details:
 - **Incumbent Vendor:** Current facility/catering company (e.g., *SIS, Updater Services, Sodexo, Compass, Local Vendor*).
 - **Contract Expiration Date:** Select the month and year the current contract terminates.
 - **Contract Status:** Set to `ACTIVE` .
4. Click **Save Intelligence**.
5. **Automated Renewal Trigger:** Exactly **30 days prior** to the expiration date, the CRM worker will automatically flag the lead and alert the sales team to present an aggressive switchover proposal.

6. WhatsApp AI Co-Pilot Command Cheat Sheet

You can send plain-English messages to the CRM agent via WhatsApp. Here are the fastest shortcut commands:

Command / Message	What the AI Agent Does
<code>STATUS</code> or <code>METRICS</code>	Returns live today's stats: emails sent, unique open rate, replies, remaining daily quota.
<code>HOT</code> or <code>SHOW HOT LEADS</code>	Lists all warm prospects who recently replied and require immediate sales action.
<code>WHO OPENED</code>	Lists all leads who opened outreach emails today, highlighting repeat openers (2x, 3x, 4x).
<code>LOOKUP [Company Name]</code>	Returns contact details, phone number, current pipeline stage, and notes for that company.
<code>PAUSE</code>	Immediately halts all outgoing automated email campaign sending.
<code>RESUME</code>	Resumes automated campaign sequence dispatching.
<code>YES</code> or <code>SEND</code>	Approves and dispatches the most recently generated AI reply draft to the client.
<code>REVISE [Your feedback]</code>	Updates the proposed reply draft with your custom instructions and seeks re-approval.
<code>ADD LEAD [Name, Email, Org, City]</code>	Automatically creates a new validated lead record in the CRM database.

7. Escalation & Support Matrix

If you encounter technical issues, follow this escalation protocol:

- **Sev-1 (System Down / Outreach Halted):** Call Engineering Support immediately (Target: < 2h response).
- **Sev-2 (WhatsApp or IMAP Issue):** Report to Admin via internal support channel (Target: < 4h response).
- **Sev-3 (General Question / Template Update):** Log ticket or email admin@vrindaacorp.com.
